

Piedmont Studio

2-story unit with a new upper level balcony; alter the exterior appearance of the structure including windows, doors, new skylights and make landscape and exterior lighting changes. We converted an existing storage structure (former garage) into a new studio second unit because the previous owner had constructed a new garage at the front of the property and former garage was no longer in use. Our design solution was the minimal changes to the exterior of the old garage structure in order to accommodate the new second unit.

[Project Facts]

Title:

Piedmont Studio – Design & Build

Location:

Piedmont, CA

Project Area:

901 ft²

Project Completion:

10.2016

Client:

WL Trust

Status:

In Progress

Project ID:

PA | T2 | AEC-Architecture | Archi-Therapy | Residential

[Project Credits]

Architects:

Michelle Lee (Project Architect), Inki Lee and Jiyun Kim

Project Consulting:

Richard K. Tapp Architects & Associates

Structural Engineering :

ACK Engineering & Surveying
